

Specially Adapted Motor Vehicles

Any motor vehicle that has been specially equipped or modified in a significant way for the purpose of transporting medically incapacitated driver or passenger may be eligible for a motor vehicle exemption. This exemption would include, but is not limited to, vehicles equipped with special hand controls, lifts, ramps, the equipping of stretchers or other special seating and significant modifications to accommodate medical equipment such as oxygen or mechanical respirators.

This motor vehicle must be used exclusively for the purpose of transporting medically incapacitated individuals.

To be eligible for this exemption, an [application](#) must be submitted and be approved by the Assessor. This exemption abates the motor vehicle tax in full. This exemption is not reimbursed by the State, and is by Town ordinance.
